

(Reg. No: PPM-034-07-04112014)

NOTICE TO MEMBERS AND INDUSTRY

UPDATE ON IMPORT DUTY FOR IMPORTED MINTED GOLD BULLION UNDER HS CODE 7115.90.10 00

14 October 2026

The Malaysia Gold Association (MGA) refers to its industry statement dated 9 July 2026 concerning the customs classification and import duty treatment of imported minted gold bullion.

Under the **Customs Duties (Amendment) Order 2026 [P.U. (A) 350/2026]**, the import duty rate for goods classified under **HS Code 7115.90.10 00** will be reduced from 10% to 0%, effective 1 November 2026.

Following further clarification from the **Royal Malaysian Customs Department (JKDM)**, MGA wishes to highlight the following:

- **Only the import minted gold bullion duty rate changes.** The existing customs classification method remains unchanged.
- **The revised rate applies prospectively from 1 November 2026.** The existing 10% import minted gold bullion duty rate remains applicable before that date. The amendment does not provide for retrospective refunds of import duties previously paid.

For clarity, imported minted gold bullion remains subject to the existing customs classification requirements. Imported minted gold bullion classified under **HS Code 7115.90.10 00** will be subject to the revised import duty rate of 0% from 1 November 2026.

MGA remains committed to providing members and industry stakeholders with clear and timely updates on relevant regulatory developments, based on official sources and clarification from the relevant authorities.

Members and industry participants are encouraged to refer to the official Gazette and comply with the applicable customs classification and declaration requirements. For enquiries concerning specific products or shipments around the effective date, clarification should be sought directly from JKDM.
